AIMS

COMPETENCES :

OBJECTIVE :

calculate radiative heat fluxes in a system, measurement of temperature and radiative properties by infrared measurements and pyrometry

Radiation heat transfer: Black body, surface properties (emissivity, reflectivity, absorptivity, transmittivity), radiation exchange between diffuse, black or gray surfaces separated by a nonparticipating medium, solar photovoltaic energy

CONTENT

Introduction to radiative heat transfer, Black body radiation, surface properties (emissivity, reflectivity, absorptivity, transmittivity), radiative metrology, radiation exchange between diffuse, black or gray surfaces separated by a nonparticipating medium, solar photovoltaic energy

Lab Infrared measurements and radiative properties of surfaces

Lab Radiation of a metal
