

Projects

Prototyping Project

IDENTIFICATION

CODE : TC-4-S1-EC-PRO
ECTS : 8.0

HOURS

Lectures :	0.0 h
Seminars :	10.0 h
Laboratory :	0.0 h
Project :	0.0 h
Teacher-student contact :	10.0 h
Personal work :	150.0 h
Total :	160.0 h

ASSESSMENT METHOD

The final evaluation is carried out by the advisors in view of:

- the quality of exchanges with the team throughout the period,
- the organization of the team and the quantity of work provided,
- the final achievement,
- and the report delivered.

AIMS

By working on an engineering or technical project, students acquire and re-mobilize a range of technical knowledge and capabilities, ideally from the different areas of the department [Computer science, communication system and network engineering].

By working in an autonomous team, guided by advisors, they also strengthen their knowledge and skills related to project management.

CONTENT

Students work full-time for 8 weeks, not counting cross-curricular subjects, i.e. on average 20 hours per week shown on the timetable and 160 hours in total.

The project is guided by two advisors. In particular, they determine the final objectives and expectations, they regularly ensure that students are working towards this goal and can, from time to time, provide assistance to resolve a technical problem. Thus, the advisors and the team participate in at least one one-hour meeting per week.

PRE-REQUISITE

It depends on the projects.
